David Phillips Professor of Molecular Biophysics: L. N. Johnson, F.R.S.

4th July, 1991.

Mr. R.A. Munday,
Munday Spatial Imaging,
39, Pyrcroft Road,
Chertsey,
Surrey KT16 9HT.

Dear Mr. Munday,

The hologram of the lysozyme model was presented to Sir David Phillips on Tuesday, 2nd July and was an instant success. It caused great excitement and interest at the meeting. I write to thank you for your excellent work in producing this original hologram.

Sir David would be interested to hear more about making the hologram. If you are willing and interested in doing this, may I suggest you write to him, indicating that it is my suggestion, and arrange a time when you could visit him in London. As Chairman of the Advisory Board for the Research Councils he has a full timetable but I think he would be glad to hear from you. His address is: Advisory Board for the Research Councils, Elizabeth House, York Road, London SE1 7PH.

I have passed your account into the University accounting system today and I hope you will receive a cheque in about 10-14 days time.

With best wishes,

Yours sincerely,

L.N. Johnson
